

## Product description

In today's fast-paced world, we've redefined "commuting comfort." This leather backpack features an 8-inch quick-access compartment, ([Men's Business Backpacks OEM](#)) allowing you to access your daily essentials in 0.5 seconds. This isn't just any bag; it's your "second skin" for your daily commute.ion.

### Key Features:

- 100% Vegan Certified: Zero animal-derived ingredients, a top choice for environmentalists
- Double-Sided Breathing System: Breathable mesh back + pearl cotton shoulder straps for sweat-free carrying
- Smart Partitioned Storage: 8-inch front quick-access compartment + main compartment for three-dimensional storage, easily accommodating 11-15-inch laptops

## User-Friendly Design

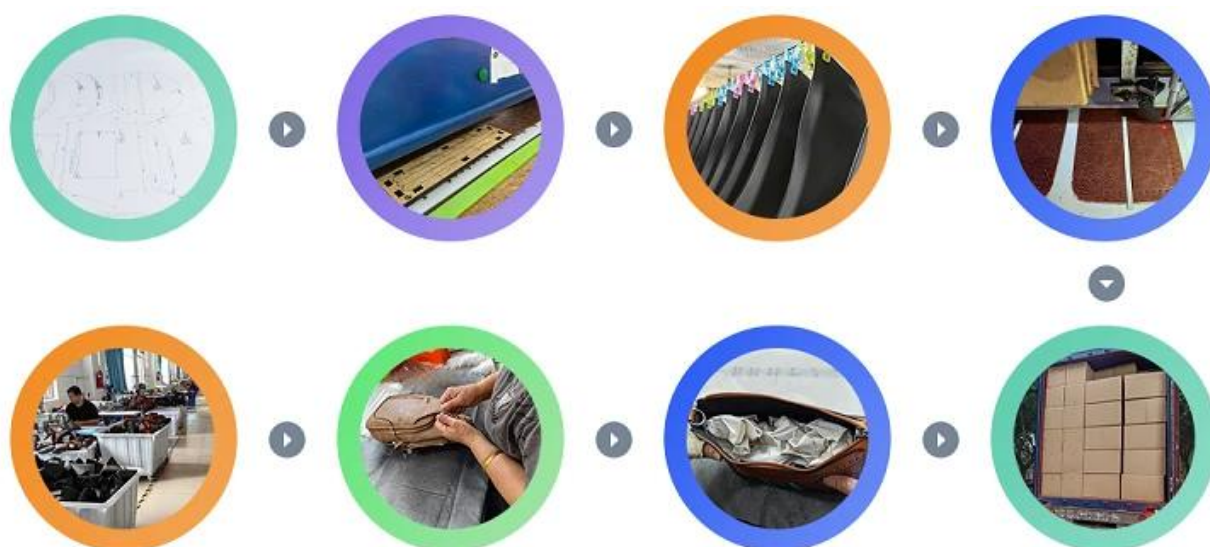

- ▶ Smooth top zipper closure for quick, one-handed access
- ▶ 3D silhouette (11 x 15 x 4 inches) for increased storage without bulk
- ▶ Pearl cotton shoulder straps distribute pressure for a cloud-like feel when carried on one shoulder

## Production process

Every handmade leather bag embodies the hard work and wisdom of craftsmen. Selected top layer cowhide is professionally cut and hand sewn by experienced masters with 15 years of experience. The dense stitching of 8 stitches per inch ensures firmness and durability.

([Sling Bag supplier in china](#)) After three strict quality inspection processes, including destructive sampling and 72 hour load testing, the hardware accessories have passed 50 opening and closing inspections. Natural leather texture paired with mirror polished oil edge, showcasing quality in every detail. From cutting to finished product, each bag goes through 28 processes and is a masterpiece of inheritable craftsmanship.

## Production workshop

The ancestral brass tools are neatly arranged on the workbench, each of which is polished to a shine. The master craftsmen are so focused when they sew by hand, as if they are performing a delicate operation. You can hear the rustling sound of the needle and thread passing through the leather, and see them occasionally holding up the semi-finished products to the light to check the alignment.

In the quality inspection area, each bag must go through the four-step inspection of "look, touch, pull and test": look at the overall shape, touch the edge smoothness, pull the zipper smoothness, and measure the load-bearing durability. Only products that pass all tests perfectly will be stamped with our quality seal.

There is no noise of the assembly line here, only the craftsmen's persistence in craftsmanship. Every bag that comes out of here carries the warmth of fingertips and the traces of time.

## Packing

Environmentally friendly thickened filling paper is used for cushioning and protection to ensure transportation safety; the simple packaging design takes into account both practicality and environmental protection concepts.

## **Sample time**

- (1) 5 days if there is glass shape and size
- (2) 12 days, if you need new shapes and sizes

## **Delivery time**

Within 60 days after the sample and order confirmed

## **Payment term**

30% deposit by T/T in advance and the balance against the copy of B/L

## **Shipment**

By sea, by air, by Express and your shipping agent is acceptable
